

Saving Water

Do you know that in some countries they don't have clean water? so they save water. And without water living things will all die. There are lots of ways to save water.

Bella

One way to save water is to always have a pitcher in the fridge you don't have to pour the faucet so that is one way to save water. Also another way to save water is to put a barrel outside to catch the water outside to water the plants. Another way to save water is to take short showers because it doesn't take a lot of water. Also to save water is when you water your vegetables

catch a hole under your vegetable so you can water your plants. another way to save water is to take showers and not bath because bath it takes 7 gallons of water. When you wash your hands and put soap on your hands the water of the soap then runs down your hands then drain your hands.

there are a lot of ways to save water. In some countries they don't have clean water so they will be using water from lakes so save water.
