Look into the crystal ball!

If you could find out one thing about your future from a fortune teller, what would it be and why?

Keep in mind: Try to explain how knowing this information would help you. Might there be any unintended consequences of knowing about your future?

Bonus: Can you imagine how you would feel finding this information out? What are some of the ways you might react? How might it change your life? (Use the back of this page to write.)
