

Yuck factor

Would you rather be scared or grossed out? Explain why, and give examples.

Keep in mind: Both of these feelings are signs that your body is doing its job to protect you from harm — signaling you to flee from a predator, for example, or not eat something spoiled. What do each of these feelings feel like? Can you think of a time you felt each?

Bonus: Design a haunted house that evokes both fear and revulsion. (Use the back of this page to draw.)
