

Getting nosy

Observations

Many living things have noses, which they use to smell things. Dogs have a better sense of smell than humans.

Science activity

Guess which nose belongs to which animal. Follow the wiggly lines to see if you are right.

Science exploration

What can you smell?
Do all things smell good? Do things that smell bad taste good?

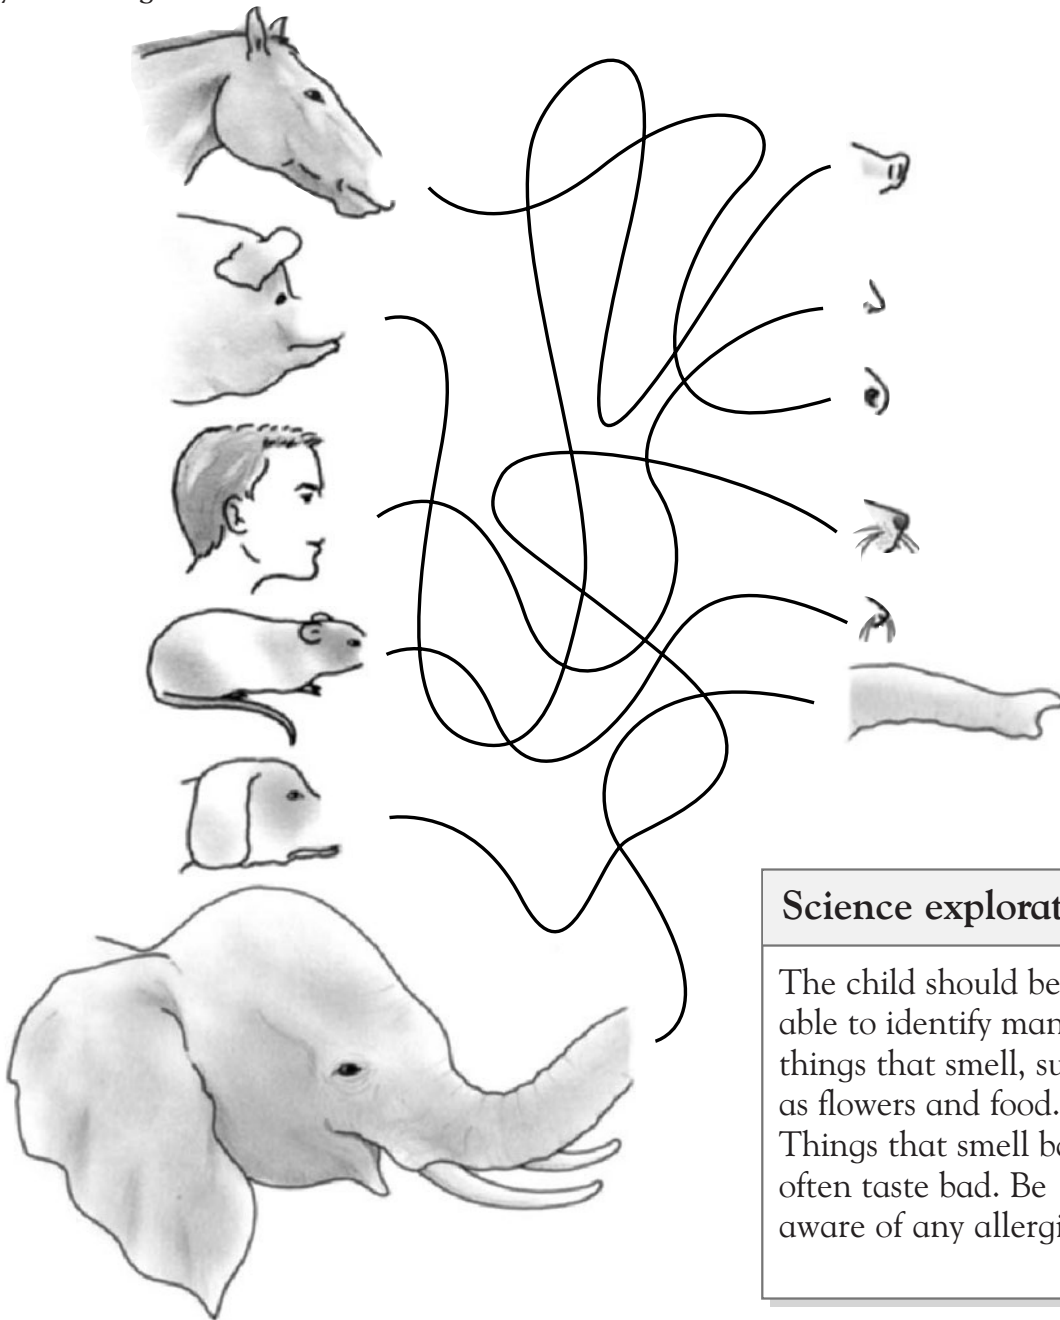

Getting nosy

Observations

Many living things have noses, which they use to smell things. Dogs have a better sense of smell than humans.

Science activity

Guess which nose belongs to which animal. Follow the wiggly lines to see if you are right.

Science exploration

The child should be able to identify many things that smell, such as flowers and food. Things that smell bad often taste bad. Be aware of any allergies.
