

COLLEGE SUCCESS AWARDS:

Celebrating High
Schools that
Prepare Students
to Succeed
in College

Acknowledgements

Report by GreatSchools

We greatly appreciate the support and contributions provided by our team and partners in the development of this report. We would like to thank New Profit for their support of the incubation and development of the College Success Award. We would also like to thank the CSA technical advisory panel for generously providing feedback on the school survey and award methodology, including Kate Akers, Peter Bergman, Clare McCann, Brennan Parton, and Jennifer Sattem. Finally, we would like to thank contributing team members, including Sarah Argodale, Kiran Banger, Heather Dooley, Charity Ferreira, Carrie Goux, Jessica Kelson, Carol Lloyd, Matthew Nelson, and Samantha Olivieri and our Board of Directors for their ongoing support and guidance as well as Bill & Melinda Gates Foundation, Carnegie Corporation of New York, Charles and Helen Schwab Foundation, ECMC Foundation, The Kresge Foundation and Spencer Foundation for their generous support of our work.

For media inquiries, please contact: cgoux@greatschools.org

INTRODUCTION

By 2020, 65 percent of all jobs will require postsecondary education, yet fewer than 25 percent of high school graduates today go on to receive a college degree, and rates are even lower for low-income and minority students.¹ Postsecondary education doesn't just confer access to particular kinds of jobs, but to better life outcomes, including better health,² job security and satisfaction and improved life expectancy.³ Preparing all students for postsecondary success, whether it is in a four-year college, community college, job training program, or the military, is both an economic and a moral imperative for our country.

Many efforts to improve college access have focused on increasing the percent of high school graduates that enter a two-year or four-year college after graduation. However, college enrollment rates don't tell the whole story. Of the students who do enroll, 68% of community college students and 40% of students in four-year colleges take remedial courses,⁴ an experience which increases the cost of college and compels many students to drop out. In far too many high schools, students don't receive the level of academic preparation, social emotional support, and pre-college counseling required to thrive in a college setting. It is critical to look not just at how many students are enrolling in college, but if they are set up to succeed in that setting.

IMPROVING THE COLLEGE PIPELINE

Improving the high school-to-college pipeline must start with an understanding of what school practices are most successful in driving student postsecondary success. At the high school level, state standardized tests, which are typically only administered to a single grade, provide an incomplete measure of school quality. Other measures of college readiness, such as college entrance exams, reflect some aspects of students' level of academic preparation, but don't capture factors such as resiliency and independence, traits that have been shown to help drive college success.

A new provision in the Every Student Succeeds Act seeks to build transparency around the high school-to-college pipeline by requiring states to report how many students from each high school enroll in postsecondary education after graduation. Some states are going a step further by publishing school-level data on college remediation rates, as well as the percent of students who return to a second year of college. Capitalizing on these new data, we are now, for the first time, able to identify, study, and celebrate schools that are preparing students to succeed in college.

The **College Success Award** (CSA) aims to do just this. By combining an analysis of postsecondary data, survey information, and on-site observations, this project seeks to better understand how some high schools support their students not only to enroll in college, but also to succeed once they get there. The goals are to identify the educational supports, philosophies and programs that yield strong results for students, to celebrate award-winning schools, and to encourage efforts to spread their success.

Although college outcomes are an important measure of a high school's capacity to prepare students for their futures, they are not the only, nor even the most important, of such metrics. The paths to high-skill, high-wage jobs are wide and varied, including job training programs, military, technical certification, and other non-traditional career preparation options. Ultimately, robust workforce outcome data would offer an even more focussed lens on how high schools support their students to succeed as adults. However, given that the currently available data is limited to two- and four-year colleges, our hope is that this project takes one positive step in connecting postsecondary outcomes to individual high schools and will lay the groundwork for even greater transparency in the future.

WE FOCUSED SPECIAL ATTENTION
ON AWARD-WINNING SCHOOLS
WHERE AT LEAST 40% OF
STUDENTS QUALIFY FOR FREE OR
REDUCED-PRICE LUNCH.

COLLEGE SUCCESS AWARD

Using school-level data that GreatSchools has collected from state education agencies on postsecondary enrollment and success, the College Success Award recognizes high schools with strong results across college preparation, enrollment, and performance. After a national data collection effort, we were able to collect sufficient data to publish the award in nine states. Next, we administered a survey to all high schools in those states—both winners and non-winners—to identify what educational best practices the winning schools were more likely to have implemented compared to non-winning schools. We focused specific attention on the award winners that serve at least 40% of students that are eligible for free or reduced-price lunch. Of those schools, we identified eight unusually high-performing, non-selective schools with low achievement gaps for site visits. These schools are featured in reported articles and videos, highlighting each school's formula for postsecondary success. Finally, we summarized our quantitative and qualitative findings into six best practices for high schools to support postsecondary success. To see articles and videos about spotlight schools and best practices articles visit, www.greatschools.org/gk/college-success-awards-2018/.

DATA COLLECTION PROCESS

In the summer and fall of 2017, we sent letters to every state plus Washington D.C. requesting school-level data on college enrollment, college persistence, and college remediation rates in an accessible form. We incorporated this data with graduation rates and college entrance exam scores, which we compiled from publicly available sources.⁵ Recent⁶ data included college enrollment rates from 14 states, college remediation data from six states, and college persistence data from nine states. We were able to calculate the College Success Award in the following nine states: Arkansas, Colorado, Florida, Georgia, Indiana, Kentucky, Michigan, Missouri, and Ohio.⁷

COLLEGE SUCCESS AWARD METHODOLOGY

The College Success Award (CSA) identifies schools where graduates have high rates of college enrollment (including two-year and four-year institutions) and students perform well in college, as compared to other schools within their state. The award is based on three equally weighted categories of data:

- **College Preparation:** This category includes high school graduation rates and college entrance exam scores (average overall SAT and/or ACT scores for a school) and, where available, college entrance exam participation rates.
- **College Enrollment:** This is the overall percent of students who enroll in either a two- or four-year college, either immediately after graduation or within 16 months of graduation, depending on the state.
- **College Performance:** This category includes the percent of students that take remedial courses in college as well as the percent of students returning to college for a second year (also referred to as college persistence).

In order to be eligible for the College Success Award, schools must have at least one component of data in all three categories. To calculate the award, we first give each school a percentile rank for each metric based on how their results compare to all other schools in their state. We then create an average of those percentiles for each school. Schools receive an award if they are in the top 30th percentile in their state based on the average percentile across all metrics and are not below the 50th percentile in any single metric.

DATA LIMITATIONS

The College Success Award creates the fullest picture of success in postsecondary education by high school that is currently possible using publicly available data. However, incomplete data create several key limitations that are worth noting at the outset.

- In many states, data is not disaggregated by student subgroup. A lack of subgroup data limits our ability to see how schools are preparing students from different racial ethnic and socioeconomic backgrounds for life after high school.
- The data used represents a snapshot in time of student progress, not a view of student improvement over time, so we are unable to isolate the school's impact from other external factors influencing student success.
- College dropout and graduation rate data are not available, preventing us from knowing how many enrolled students graduated with a degree.
- None of the data available includes workforce outcomes and not many states publish data on vocational training programs.
- The types and amount of data on college readiness, enrollment, and performance that is reported varies from state to state. For instance, Florida does not publish college remediation data and Ohio does not publish college persistence data. Seven out of the nine states do not publish SAT/ACT participation rates, so it's difficult to know if their college entrance exam scores reflect widespread abilities of all the students or just a small minority. States also vary in their definition of the measures. For instance, Kentucky includes vocational enrollment in their calculation of college enrollment data, while most other states only include two- and four-year colleges. Some states only report enrollment in in-state public institutions, while others report enrollment in any college, using data from the National Student Clearinghouse. Finally, the recency of the data ranges from 2015 to 2017. In order to address the variation state by state, the CSA methodology compares schools to others within the same state.

TABLE 1. DATA AVAILABILITY, BY STATE.

	College Preparation			College Enrollment		College Performance
	Graduation Rates	ACT	SAT	% of graduates enrolled in college	% of students taking remedial courses	% of students enrolling for second year
Arkansas	x	x		x	x	x
Colorado	x	x	x	x	x	x
Florida	x		x	x		x
Georgia	x	x	x	x	x	x
Indiana	x	x	x	x	x	x
Kentucky	x	x		x	x	x
Michigan	x		x	x	x	x
Missouri	x	x		x	x	x
Ohio	x	x	x	x	x	

A detailed list of each data source is listed in Appendix B.

COLLEGE SUCCESS AWARD WINNERS

Across the nine states, 3,849 public schools had enough data to include in the award calculations. Of this group, 814 schools (21%) were identified as winners. Out of these 814 winning schools, 165 serve a low-income student population, which we defined as at least 40% of the student body qualifies for free or reduced-priced lunch.

TABLE 2. NUMBER OF COLLEGE SUCCESS AWARD WINNERS BY STATE

State	Total Winners	Total Winners with 40%+ FRL	Total Winners with <40% FRL	Total High Schools with Data	Percent of Total High Schools that Received an Award	Percent of Charter Schools that Received an Award	Percent of District Schools that Received an Award
Arkansas	35	18	17	268	13%	25%	13%
Colorado	71	4	67	283	25%	32%	24%
Florida	125	34	91	499	25%	42%	23%
Georgia	97	34	63	367	26%	67%	25%
Indiana	45	4	41	371	11%	0%	13%
Kentucky	37	14	23	228	16%	n/a	16%
Michigan	175	12	163	673	26%	7%	28%
Missouri	72	14	58	438	16%	0%	17%
Ohio	157	31	126	722	22%	12%	22%
Total	814	165	649	3849	21%	21%	21%

Averaged across the nine states, charters are proportionally represented among award winners; five percent of award winners, and six percent of award winners serving more low-income students, are charter schools, compared to five percent of non-winners. However, there are significant variations by state in the proportion of charter school award winners. In Georgia, Florida, Colorado, and Arkansas, charters are more likely than district schools to win the award. For example, in Georgia, 67% of charter schools with sufficient data won the award, compared to 25% of district schools. In Indiana, Missouri, Michigan, and Ohio, charters are less likely than district schools to win the award, including in Indiana and Missouri where no charters won the award. Kentucky did not have any charter schools to be included in the award.

Table 3 shows a snapshot of how award-winning schools overall, as well as those serving more low-income students, compared to non-winners. Award winners, obviously, have higher rates of college preparation, enrollment, and performance than non-winners, but they also have higher state standardized test scores, as measured by the GreatSchools Test Score Rating⁸ (even though those tests weren't factored into the award). Many—but not all—winners post high scores on state tests; 56% of award winners with sufficient data have a GreatSchools Test Score Rating of 8 or higher (compared to only 10% of non-winners). Similarly, not all schools with high test scores also have strong postsecondary outcomes. Of the schools in the nine states that have a Test Score Rating of 8 or higher, 59% of them received the CSA Award while 41% did not. While the correlation between state tests and college outcomes is not surprising, the CSA is identifying schools with college success rates that wouldn't otherwise be captured by looking at test scores alone.

Overall, award winners tend to be larger; average enrollment at award-winning schools is 1,227, compared to 811 at non-award winning schools. Award-winning schools serve a lower population of low-income students than the population at large.

TABLE 3: AVERAGE RESULTS AND CHARACTERISTICS OF CSA WINNERS, LOW-INCOME AWARD WINNERS, AND NON-AWARD WINNERS, INCLUDING ALL STATES.

Metric (average)	Award Winners	Award Winners with 40%+ FRL	Non-Winners
Graduation Rate	95.0	94.8	86.9
SAT score (in states with SAT out of 1600: CO,IN,MI)	1074	1032	950
SAT score (in states with SAT out of 2400: OH,GA,FL)	1579	1542	1449
ACT score	22.7	21.3	19.6
College Enrollment (%)	78.3	76.4	60.6
Percent of students not requiring remediation in college	86.5	84.5	72.9
Percent of college students persisting for 2nd year	70.3	64.0	53.8
GreatSchools Test Score Rating	7.6	6.7	4.8
Percent of students eligible for free or reduced-price lunch	28.4	54.5	55.4
Enrollment	1227	938	811
Charter Schools (%)	5	6	5
Total Schools	814	165	3035

SURVEY OF SCHOOL PRACTICES AND CULTURE

We administered a survey, focusing on school culture, college preparation, and college admissions support, to both award-winning and non-award-winning schools. Of the 3,849 eligible schools across nine states, surveys were emailed to ~3,400, and with 227 completed surveys returned (a 7% response rate), including 85 CSA winners and 142 non-winners. Drawing from research on college support and preparation best practices, the 44-question survey included quantitative and open-ended questions about counseling services, academic clubs, teaching practices, communication and technology systems, pedagogical models, college-going culture and philosophy, parental involvement, advanced course offerings, college application supports, and partnerships with college prep programs. The survey was designed to identify concrete tactical differences in how schools help students get support for the college application process as well as broader insights into which programs, course work, and cultural practices are most common at schools where the majority of students are academically prepared for college. Below, we share key findings where we found significant differences between the responses for award winners and non-winners and discuss some areas where the responses were not significantly different.⁹

Key Finding #1: Award winners are more likely to provide access to rigorous academic offerings in school and through extracurricular programs.

Award-winning schools report providing more advanced academic offerings and academically challenging extracurriculars than non-award winners, and they make those opportunities for advanced learning more widely available across the student body.

Ninety-nine percent of award-winning schools offer Advanced Placement (AP), International Baccalaureate (IB), or honors courses to their students, compared to 87% of non-award-winning schools. Award-winning schools also report having a greater variety of AP courses, particularly in STEM subjects; award-winning schools are more likely than non-winners to offer AB and BC Calculus, AP Computer Science and Computer Science Principles, AP Statistics, AP Biology, AP Chemistry, AP Environmental Science, AP Physics (Electricity and Magnetism) and AP Physics (Mechanics).

Award-winning schools also take concrete steps to increase student access to advanced coursework. Award winners allow their students access to these classes at an earlier age: 63% of award-winning schools allow 9th graders to take these advanced courses and only 10% limit advanced-course enrollment to 11th and 12th graders, whereas 49% of non-award-winning schools allow 9th graders access and 24% require students to wait until 11th grade or later to enroll in an advanced course. Award-winning schools also reported fewer disparities in enrollment in advanced classes in terms of gender; 74% of award-winning schools report having an equal number of boys and girls in their advanced courses, compared to 58% of non-winners. Finally, award winners are also more likely to reduce financial barriers to advanced courses that can provide college credit for students. Eighty-four percent of award winners report offering financial assistance for AP and IB exams, compared to 71% of non-award-winning schools .

Outside of the traditional school day, award-winning schools are more likely than non-winners to offer academically oriented clubs and activities such as chess club, Math Olympiad, debate team, newspaper, and Model UN. Interestingly, not all academic clubs were differentiators for award winners: the availability of robotics, the most commonly reported academic club, was not significantly different between award-winning and non-award-winning schools.

There was one notable similarity between award winners and non-award winners: most schools report that advanced classes do not have representative numbers of students enrolled from the school's ethnicities. In fact, over 70% of all schools reported that their advanced courses do not reflect the school's demographics. This points to further need for schools to make sure they are making advanced classes available across their community.

Key Finding #2: Award winners are more likely to have systematic approaches to identifying and supporting at-risk students at every grade level of high school - not just 9th grade.

Research shows that identifying students who are at risk for not graduating or not meeting college eligibility requirements is essential for ensuring that more students experience college success, and this message seems to have been heard loud and clear: 97% of award-winning schools and 91% of non-award winners report having practices that identify and support at-risk students.

However, we saw a key difference in how programs to identify and reach out to at-risk students. While winners and non-winners were both highly likely to reach out to at-risk students in the 9th grade (92% and 96% respectively), award winners were more likely than non-winners to continue to have intervention practices for at-risk students in place for students in the 10th, 11th and 12th grades, as shown in Figure 1.

FIGURE 1: PERCENT OF SCHOOLS THAT IDENTIFY AND CONTACT AT-RISK STUDENTS BY GRADE.

AWARD-WINNERS WERE MORE LIKELY TO HAVE INTERVENTION PRACTICES FOR AT-RISK STUDENTS IN THE 10TH, 11TH & 12TH GRADES

Key Finding #3: Award winners are more likely to have more robust staffing for academic guidance counselors and college counselors.

Access to advanced academic coursework and other forms of college preparation are not sufficient to ensure that most high school students enroll and succeed in college. College eligibility requirements are not widely understood and many students need academic guidance throughout high school to help them choose classes that will keep the doors to college open. In addition, most students need tactical and emotional support to navigate an increasingly complex college application process. Indeed, empirical evidence suggests that academic advising and college counseling can have a significant impact on student success.

The survey found a similar link between access to counseling services and students' college outcomes. Eighty-one percent of award winners reported having two or more academic guidance counselors, who monitor student progress toward graduation and advise students on course selection, compared to 49% of non-winners. The results were similar for college counselors: 33% of award winners report having one college counselor and 47% reported having two or more, while 57% of non-winners have one counselor and only 24% have two or more.

Another interesting difference is that at award-winning schools, college counselors are more closely tied in to student data. At 63% of award-winning schools, college counselors have access to their school's Student Information System, compared to 47% of non-winners. These results speak to the importance of college counseling in high school, and the value of college counselors being more well-informed about each student's academic progress.

FIGURE 2: NUMBER OF ACADEMIC GUIDANCE COUNSELORS ON STAFF, BY SCHOOL

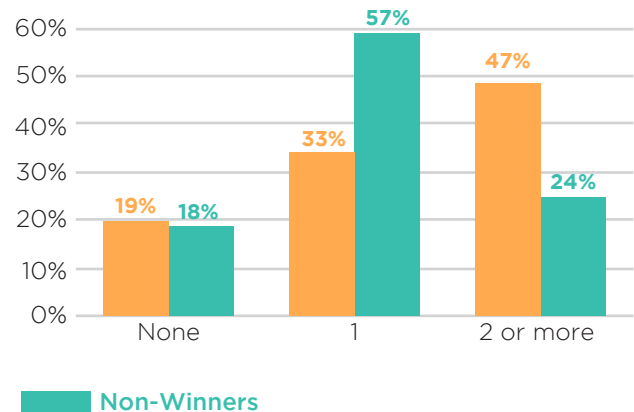

FIGURE 3: NUMBER OF COLLEGE COUNSELORS ON STAFF, BY SCHOOL

AT 63% OF AWARD-WINNING SCHOOLS, COLLEGE COUNSELORS HAVE ACCESS TO THEIR SCHOOL'S STUDENT INFORMATION SYSTEM,

CONSIDERATIONS FOR FUTURE RESEARCH

The survey included additional questions on school culture and the school practices through which a school's culture and philosophy are implemented. Interestingly, we did not find that a "college for all" philosophy is a clear differentiator for award winners. Only 42% of award winners indicated that they had adopted an explicit "college for all" philosophy which was not significantly different from non-winners. Although this may seem counterintuitive, the visits that our team made to eight award winners offered a glimpse at how college success and multiple postsecondary pathways need not be at odds. A majority of these schools had developed robust vocational education programs that were "stigma-free." All students were invited to participate in both vocational education courses and advanced academic coursework.

We also asked about what specific practices the schools adopted that reflect their philosophy about college. Support for FAFSA applications, parent education on the college process, and hosting college representatives at school were some of the most commonly-cited practices. It is important to note, though, that these practices were similarly reported by non-winners, so more research is needed to understand how school practices relate to student outcomes.

TABLE 4. HOW IS YOUR SCHOOL'S PHILOSOPHY ABOUT COLLEGE MANIFESTED?

School Practice	Percent of Winning Schools
Our school offers support for parents/students to fill out the FAFSA and other forms.	88%
Our school hosts parent education nights about the college process.	86%
Our school hosts college representatives and fairs.	86%
The walls of our school reflect signs, ideas, and opportunities about the focus on attending college.	74%
Students go on field trips to local colleges.	71%
Outside speakers are brought in to reinforce our schools' perspective on college.	68%
All teachers share similar talking points to reinforce ideas.	56%

The survey also included questions about other college preparation programs such as dual-enrollment, partnerships with local colleges, and partnerships with college preparation programs. Our survey responses did not reveal consistent differences between award winners and non-winners in terms of participation in these programs. Almost all schools – over 95% of winners and non-winners – offer dual enrollment classes for students and over 80% have some sort of formal partnership with either a community college or a four-year college. The majority of both winners and non-winners did not report that they have partnerships with third party college prep programs. Further research is required to better understand access and implementation of these types of college preparation programs.

SPOTLIGHT SCHOOL

NEWBURY JR./SR. HIGH SCHOOL

TIGHT-KNIT COMMUNITY + OPPORTUNITIES TO EXPLORE FUTURE JOBS + INDIVIDUAL SUPPORT.

Set in a declining, semi-rural community southeast of Cleveland, Newbury Jr./Sr. High School stands out as a model of supporting postsecondary success. Though many parents have professional backgrounds, 52% of students come from low-income families. Yet the school boasts impressive college success metrics. The average ACT score is 22 and nearly nine in ten graduating seniors enroll in college. Few students need remediation in college (12% for math and 6% for English). Perhaps most impressive, test scores reveal no equity gap between students from low-income and non-low-income families.

TIGHT-KNIT COMMUNITY

Close community ties have always been part of Newbury's success. The district is so small that it is housed in one large building. Each graduating class has only about 40 students. Principal Michael Chaffee doesn't just know students' names: he knows their interests, their struggles, and the progress they're making towards their goals. "There is a family feel to what we do," he says. "We are creating an environment of belonging."

Principal Chaffee has been at Newbury's helm since he joined the district three years ago. Since then, his innovations have included block scheduling, daily teacher collaboration, and a monthly luncheon for students recognized for exhibiting strengths, such as kindness or compassion. To bring the school together, Friday afternoons are reserved for community building, when students separate into "houses" for pep rallies and service activities.

OPPORTUNITIES TO EXPLORE THE FUTURE

For a small school, Newbury offers a tremendous number of opportunities. Elective classes are designed based on students' interests, ranging from yoga and drawing to weightlifting and the history of film. Newbury sees its competitors as the region's elite private schools — places like Gilmore Academy and Hawken School, where students study entrepreneurship and constitutional law, compete in golf clubs, or enjoy on-campus swimming pools and an ice skating rink. Yet Newbury offers something unique: a strong commitment to individual student interests.

"I think Newbury has helped me get ahead," says Junior Sage Neidbalson, who hopes to attend Pennsylvania State University and become an orthodontist. By the time she graduates, she will have completed one year of college — all while participating in volleyball, softball, band, choir, and cheerleading.

"When people think small, they think no opportunities," says junior Hannah Grubbs. But Grubbs says Newbury's size makes it easier "to go far and figure out what you want to do." Hannah is involved in the high school's peer mentoring initiative, the publications club, and the National Honors Society. She takes [College Credit Plus](#) courses at Kent State University and wants to be a writer. She also competes on Newbury's basketball, track, and co-ed soccer teams.

The high school has a strong partnership with Auburn Career Center, a nearby technical school. There is no stigma associated with vocational tracks at Newbury. In fact, many college-bound students take advantage of Auburn's offerings to enhance their skills and build stronger college applications. Many students who participate in technical learning experiences also enroll in courses that result in college credit, and Newbury encourages interested students to explore both. While the high school offers limited AP courses, dual-enrollment opportunities through Ohio's College Credit Plus program are abundant and easily accessible.

INDIVIDUAL SUPPORT

"We try to meet every child where they are and advance their talents," Chaffee says. "Coming here gave me a chance to try things that I always thought would work in a really supportive atmosphere."

For example, students can access tutoring any afternoon they need it, and core academic teachers are available to assist students identified for intervention. With individual students in focus, Newbury's innovative offerings prepare graduates to go far. At Newbury, Chaffee says, "we really try to let kids be who they are."

CONCLUSION AND RECOMMENDATIONS

The nine states included in the College Success Award have taken an important step forward in providing improved transparency about college outcomes for students, which is critical for understanding how the K-12 education system can better prepare students for long-term success. Powered by this data, we are able to identify schools that help more students get to college and succeed while there, which has previously not been possible. These schools deserve to be recognized, celebrated, and studied. Our survey findings provide some early insight into the practices that differentiate these schools, and our hope is that schools across the country can draw from these lessons when deciding which changes or initiatives to implement to improve their own students' outcomes.

Going forward, there are several achievable improvements that states can take to build on this work and provide even more meaningful data to drive improvement.

Recommendation #1: States should go beyond minimum reporting requirements to provide the public with data on student remediation and persistence rates.

ESSA requires states to publish data on college enrollment, which is a helpful starting point but does not go far enough to provide parents with critical information on student preparation for college. At time of publication, only ten out of 51 states provided school-level data on student remediation and college persistence, in a format that was accessible by third-party organizations. Parents, students, educators, and the research community need this critical data to inform decisions and identify successful strategies. Other states should learn from the states listed in this report about best practices in data governance and stewardship and follow their lead in providing increased transparency.

Recommendation #2. States should measure and publicly report on college completion, in addition to second-year persistence.

In the fall of 2018, 20.7 million students are expected to be enrolled in a 2- or 4-year postsecondary institution¹⁰, yet on average only 57% of students earn a degree within 6 years, and Black and Hispanic students have an even lower completion rate of 29% and 38%, respectively.¹¹ For most states publishing postsecondary data at the school level, persistence is tracked only until a student's second year. College completion rates finish the picture of how individual high schools are preparing their students for college success and the potential for their students to thrive in the workplace and more fully contribute to the economy. States should provide data, broken down by subgroup, on students completing a 2-year degree within 3 years and students who complete a 4-year degree within 6 years.

Recommendation #3: Data on success in vocational or technical schools and programs should be reported along with other postsecondary measures.

Professional certification and job placement add an important piece to the puzzle of how high schools are preparing students for success. Twenty-nine million jobs in the U.S. are "middle-skill" jobs, jobs that require some profession or technical training or an Associates degree. These are the jobs that provide middle class wages in our country and, in many cases, allow families to break the cycle of poverty. State education agencies can partner with leaders in the career and technical education fields and work to track student matriculation to job training and technical certificate programs.

Recommendation #4: Connect data systems to provide greater transparency into student workforce outcomes.

Data on workforce outcomes are a better and broader indicator of postsecondary success because it includes students who choose vocational, technical schools, military, and immediate entry into the workforce, in addition to students who attend college. States can explore opportunities to connect K12 data with workforce data, in order to provide insight into the job placement of students within five years of graduation.

Recommendation #5: Disaggregate postsecondary outcome data by student subgroups, including race, income, and gender.

The only way to understand how schools are serving all students, where there are equity gaps, and where schools are succeeding or falling short in supporting disadvantaged populations, is to provide disaggregated data. States should provide all data broken down by student group, including race and income level.

Recommendation #6: States can learn from each other and adopt consistent reporting standards across college remediation and persistence.

We found considerable differences in how states define and track college enrollment, remediation, and persistence. This can mask important differences when evaluating outcomes across states. Standards for postsecondary data will allow for better policy discussions, funding decisions, and will allow parents to view clear, consistent information in order to make better choices about their child's education.

APPENDIX A: LIST OF AWARD WINNERS

COLLEGE SUCCESS AWARD WINNERS

*School serves more than 40% of students eligible for free or reduced-price lunch

School name	City	District name	School Type
ARKANSAS			
Batesville High School	Batesville	Batesville School District	District

APPENDIX B: LIST OF DATA SOURCES

Below is a more detailed description of the data available in each state with award-winning schools. Note that College Enrollment and College Performance categories differ state-to-state on if they include public or private, in- or out-of-state, or two- year or f-year institution data.

State	Category	Data Used	Source	Year
AR	College Preparation	Graduation rate (4-year cohort) More details here .	AR DoE	2016
		Average ACT Scores More details here .	AR DoE	2016
	College Enrollment	Percent of students who enrolled in public or private in-state institutions, either 2- or 4-year.	AR DoE	2016
	College Performance	Percent of students at public or private in-state institutions, either 2- or 4-year, who needed remedial instruction.	AR DoE	2016
		Percent of students at public or private in-state institutions, either 2- or 4-year, who continue to a second year	AR DoE	2016
CO	College Preparation	Graduation Rate (4-year cohort) More details here .	CO DoE	2016
		Average SAT Score More details here .	CO DoE	2017
	College Enrollment	Percentage of students who enrolled in college following graduation. This includes in- and out-of-state schools, 2-year and 4-year, and public or private. More details here .	CO DoE	2017
	College Performance	Percentage of students enrolled in public in-state institutions who required remedial instruction. Includes 2-year or 4-year. More details here .	CO DoE	2017
		Percentage of students enrolled in in-state institutions and continued on to a second year. Includes 2-year or 4-year. More details here .	CO DoE	2016
FL	College Preparation	Graduation Rate (4-yr cohort). More details here .	FL DoE	2016
		Average SAT Scores. More details here .	FL DoE	2014
	College Enrollment	Percent of graduates entering a 2-year or 4-year institution 16 months of graduation.	FL DoE	2015
	College Performance	Percent of high school graduates who earned at least 1 year of college credit in 2 years.	FL DoE	2015
GA	College Preparation	Graduation Rates (4-year cohort) More details here .	GA DoE	2016
		Average SAT and ACT Scores More details here .	GA DoE	2016
	College Enrollment	Percentage of students who enrolled in any institution after high school graduation. Includes 2-year or 4-year, public or private, and in-state or out-of-state. More details here .	GA DoE	2016
	College Performance	Percentage of enrolled students who require remediation at Georgia public institutions. Includes 2-year or 4-year institutions. More details here .	GA DoE	2016
		Percentage of enrolled students who continued on to a second year at a Georgia public institution. Includes 2-year or 4-year. More details here .	GA DoE	2016

State	Category	Data Used	Source	Year
IN	College Preparation	Graduation Rate (4-yr cohort). More details here .	IN DoE	2016
		Average SAT and ACT Scores. More details here .	IN DoE	2015
	College Enrollment	Percent of students who graduated from college and immediately enrolled in any institution, including 2- or 4-year and in- or out-of-state schools.	IN DoE	2016
	College Performance	Percentage of Indiana public college-going students in need of remedial instruction.	IN DoE	2016
		Percentage of students who started their freshman year at an Indiana public college and who continued enrollment into the fall semester of the second year at any Indiana public college.	IN DoE	2015
KY	College Preparation	Graduation Rate (4-year cohort) More details here .	KY DoE	2016
		Average ACT Scores More details here .	KY DoE	2016
	College Enrollment	Percent of students who enrolled to an in- or out-of-state institution, 2-year or 4-year.	KY DoE	
	College Performance	Percent of students enrolled in an in- or out-of-state institution who needed remedial instruction, including 2-year or 4-year.	KY DoE	2016
		Percent of students enrolled in an in- or out-of-state institutions who continue on to a second year.	KY DoE	2016
MI	College Preparation	Graduation Rate (4-yr cohort). More details here .	MI DoE	2016
		Average SAT Scores. More details here .	MI DoE	2016
	College Enrollment	Percent of graduates entering a 2-year or 4-year institution within 16 months of graduation. Includes in- and out-of-state and private or public institutions. More details here .	MI DoE	2016
	College Performance	Percent of students enrolled in 2-year or 4-year Michigan college who need remediation. More details here .	MI DoE	2016
		Percent of students who entered a Michigan college and returned for a second year. More details here .	MI DoE	2016
MO	College Preparation	Graduation Rate (4-year cohort) More details here .	MO DoE	2016
		Average ACT Scores More details here .	MO DoE	2016
	College Enrollment	Percentage of students who enrolled in a public, in-state institution - either 2-year or 4-year - in the fall semester following graduation.	MO DoE	2016
	College Performance	Percentage of students enrolled in public, in-state institutions - 2-year or 4-year - in need of remedial instruction.	MO DoE	2015
		Percentage of students who returned to college after their first and second semester. Public, in-state institutions only.	MO DoE	2016
OH	College Preparation	Graduation Rate (4-year cohort) More details here .	OH DoE	2015
		Average SAT and ACT Scores More details here .	OH DoE	2015
		SAT and ACT Participation Rates More details here .	OH DoE	2015
	College Enrollment	Percentage of students who enrolled in an Ohio public university or community college following graduation. More details here .	OH DoE	2015
	College Performance	Percentage of students enrolled in an Ohio public university or community college and needed remedial instruction. More details here .	OH DoE	2015

ENDNOTES

1. Center for American Progress, "[College For All: Strengthening Our Economy Through College For All](#)" Feb. 19, 2015. College matriculation rate for high school graduates is 65.9% (National Center for Education Statistics, <https://nces.ed.gov/fastfacts/display.asp?id=51>) and college completion rate is 52.9% (National Student Clearinghouse, <https://nscresearchcenter.org/signaturereport10-statesupplement/>).
2. Effects of Timing and Level of Degree Attained on Depressive Symptoms and Self-Rated Health at Midlife; American Journal of Public Health (AJPH) March 2012, <https://ajph.aphapublications.org/doi/abs/10.2105/AJPH.2011.300216>.
3. Trostel, Philip, et al. "It's Not Just The Money: The Benefits of College Education to Individuals and to Society" Lumina Foundation, Center and School of Economics, University of Maine. <https://www.luminafoundation.org/files/resources/its-not-just-the-money.pdf>
4. National Center for Education Statistics, 2016 "Remedial Coursetaking at U.S. Public 2- and 4-Year Institutions: Scope, Experience, and Outcomes" <https://nces.ed.gov/pubs2016/2016405.pdf>
5. While other states may publish some portion of this data in aggregate or incorporated into state-created school report cards, we collected data that could be downloaded and results could be tied to individual school ID numbers.
6. For this purpose, we consider data from the 2016 or 2015 school year to be sufficient for inclusion in the award.
7. We were ultimately able to collect the data for Oklahoma, Minnesota and Connecticut, but not in time for inclusion in this report.
8. The GreatSchools Test Score Rating measures schools on proficiency, using performance (the percentage of students scoring at or above proficiency) on state assessments across grades and subjects, compared to other schools in the state, to produce a 1-10 rating for each school.
9. Differences cited in the report between winners and non-winners are statistically significant at the 95% confidence level. https://nces.ed.gov/programs/digest/d16/tables/dt16_105.20.asp?current=yes
